PRMA Consulting is a fast-growing company specializing in the pricing, reimbursement and market access of pharmaceuticals. We work with our clients to deliver strategic solutions that maximize the market opportunity for their products. This can involve formulating health economic outcomes and pricing strategy, and building and communicating evidence-based value propositions across international healthcare systems.

We are headquartered in the UK, with offices in the UK, US, and Greece, and country experts around the world. Our clients include the top 20 global pharmaceutical companies, and biotechnology, medical device, and diagnostic companies.

PRMA Consulting provides a stimulating and challenging work environment, and clear career progression for self-motivated talented individuals. We have a strong focus on quality and encourage all our staff to take ownership and responsibility of projects whilst working across and within teams.

We are seeking Consultants to join our team to support our 2018/19 business plan. Successful candidates will be responsible for the management and delivery of projects that provide solutions to the most cutting-edge market access challenges in the industry.

Duties and responsibilities of the role

The role will involve working within a team on data synthesis, developing deliverables for clients to include strategic insights and recommendations, therefore your ability to interpret data from a variety of sources and communicate these effectively is essential.

Consultants will project manage a number of strategic and technical projects including managing the day-to-day delivery of projects, and project teams to time, budget and the highest quality, this will involve:-

- Performing quantitative or qualitative analysis
 - Designing, structure and deliver presentations that are appropriate to the audience
 - Working alongside the Project Lead to develop strategic insights and recommendations for clients
 - Report financial project update data accurately to aid business planning
-

Requirements

We are looking for candidates with an outstanding academic background who are confident operators at all levels. The successful candidates must possess a post-graduate qualification in a relevant scientific, medical or economic discipline and first-hand experience of one or more of the following:

- Market access strategy
- Pricing and reimbursement
- Health economics
- Statistical analysis (experience of using STATA and/or SAS)
- Analysis and interpretation of clinical trials

More specifically, we are looking for:

- Demonstrable experience of building evidence-based value propositions across different healthcare systems and making submissions to P&R and HTA agencies
- A strong understanding of how to define, create and communicate product value
- Strong teamwork and leadership skills
- An outstanding work ethic and commitment to delivering timely, high-quality work
- First-rate written and verbal communication skills
- The ability to interpret data from a variety of sources, generating insights for clients
- Excellent commercial, analytical, problem-solving, communication and interpersonal skills
- Excellent project-management skills, a well-developed commercial outlook and good customer focus
- Competent in Excel, able to work with complex multi-sheet spreadsheets, and QC data
- Knowledge and understanding of the dynamic P&R environment

We offer rapid career enhancement and personal development for the right candidate, along with the opportunity to work alongside an international and diverse group of talented professionals.
