

Transform your market access processes

[Read the case study >>](#)

A new way to accelerate the generation of high-quality draft HTA submissions with the PRMA Navigator®.

The content linking proficiency¹ of PRMA Navigator® eliminates the prolonged searching and transferring of content from global, regional and local supporting materials to draft submissions.

Now, when an update to supporting document is detected, the corresponding content in the draft submission automatically reflects the change, ready for local review.

The quality of the draft submission is also improved as the most up to date materials are easily shared and used consistently across all HTA submissions.

With PRMA Navigator®, your organization will maximize the use of supporting materials, release valuable resource, and accelerate the generation of high-quality, simultaneous draft HTA submissions.

Read the case study to learn how a top-5 global pharma company auto-populated a partial submission for each country within 2 weeks.

1. At the time of publication the PRMA Navigator® content linking proficiency has European patent pending status.

Using the PRMA Navigator® means that affiliates can focus more on the strategy and improving the submission, rather than commencing work by reading the material.

Director, top-10 pharmaceutical company

The HTA submission that we produced using the PRMA Navigator® saved us weeks. The robust content provided a high-quality first draft. We will happily use the PRMA Navigator® for our next three submissions.
